THE FACILITY MANAGEMENT MARKET

Research reports on the size and scope of the Facility Management global market vary widely and attest to the increasing importance of facility and real estate management data for business operations' decisions.

In May 2022, Fortune Business Insights reported the global facility management market is projected to grow from \$1,260.36 billion in 2022 to \$1,856.44 billion by 2029. Fortune predicts the demand for facility management solutions and services is likely to expand considerably over the next few years*.

Further, according to OSCRE International, Environmental, Social and Governance (ESG) initiatives are a top priority for the industry and provide a unique opportunity for collaboration between real estate investors, owners and occupiers. They share a common need for what's collected at the real estate asset level that's accessible, consistent and can be exchanged across multiple systems.

FMs are the leaders in integrating smart building technology, increasing the sustainability of the physical environment and data, keeping occupants safe and healthy, and managing hybrid workplaces and shifting space needs.

If your business delivers a service, software or product that FMs and design professionals can use to support their organizations and clients, please consider reaching our audiences. The following pages reveal their volume, buying power, interests and engagement with our digital content—and that of our industry partners and advertisers—every week and month of the year.

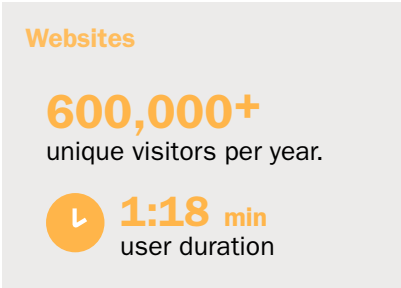

OUR BRANDS CONNECT WITH THE FM MARKET

The McGraw Reports, FMLink and the AFE newsletters are essential resources for anyone responsible for designing, building, managing or maintaining workplace facilities. Industry suppliers, manufacturers, and service providers build awareness of their products and services by aligning their advertisements with relevant content that educates, inspires and helps facility managers do their jobs.

Our brands:

- ▶ Reach key decision-makers, influencers and insiders through multiple channels. Target audiences include a cross-section of FM, engineering and A&D professionals in the commercial, education, healthcare and government sectors.
- ▶ Offer influential access through our audience affinity and close partnerships with leading industry associations, conferences and trade shows.
- ▶ Provide myriad digital marketing solutions, including advertising, direct email marketing outreach and other forms of content dissemination. Marketers can publish their existing white papers, case studies, e-books and webinars exposing this content to an audience that might not otherwise see it.
- ▶ Furnish custom solutions and content creation, including product advertorials, white papers and case studies. Our expert editorial staff can assist in interviewing, writing and publishing content that positions companies as experts and knowledge providers to the FM audience.

About our audience

Meet our readers

ABOUT US

THE McMORROW REPORTS

- Founded in 2004, The McMorrow Reports is a trusted source of facility management and design insights.
- Its mission is to inform, educate, inspire, connect and empower the industry.
- The content helps manufacturers and service providers find new audiences, make connections and develop business opportunities that increase sales and provide a high return on their media investment.

FMLINK

- Launched in 1995, FMLink is one of the largest worldwide online publications designed to exclusively meet the information needs of FM professionals.
- It provides facilities managers with concise, actionable advice that maintains their interest and advances the FM profession.
- The website boasts one of the most robust repositories of facilities information in the world, with more than 35,000 pages of valuable content: news, products, events, analyst insights, surveys and reports, checklists, directories, and more.

A FE

- A member-based organization established in 1915, the Association for Facilities Engineering provides education and certification opportunities for professionals who maintain, manage and secure the built environment.
- Monthly newsletter contains industry news, product announcements, case studies, white papers and articles, as well as AFE-specific news and events.
- Newsletter content engages on a broad range of topics pertinent to facilities engineering professionals working in all business sectors, including commercial, manufacturing, education, healthcare and government facilities.

Our team

Eileen McMorrow

Editor-in-Chief

- 35+ years as a journalist covering the facilities management and design industry.
- Former Editor-in-Chief of *Facilities Design & Management* magazine.
- ProFM Credential Commissioner.
- Former member of the Board of Directors of the International Facility Management Association (IFMA).
- An industry insider with strong relationships and partnerships with top conferences and trade shows including IFMA's World Workplace, IFMA's Facility Fusion, NFMT, NeoCon, Healthcare Design, and AHR.
- Creator and Director of the Best of NeoCon Awards Competition for product design and the Nightingale Awards for product design in healthcare environments.

*Audience Profile October 2022

THE McMORROW REPORTS

- Founded in 2004 by Eileen McMorrow, former Editor-in-Chief of Facilities Design & Management magazine, with the mission to inform, educate, inspire, connect and empower the industry.
- A trusted source of facility management and design insights, it covers all the major news and industry events from FM and A&D perspectives.
- Monthly dedicated newsletters with content devoted to specialized sector audiences: Commercial, Healthcare, and Education & Government.
- Editorial reflects growing FM responsibilities as they evolve to meet the needs of changing workplaces. Emerging hybrid work trends complicate the management of workplace facilities, requiring space redesign, new technology, and product solutions.
- Design content is increasingly important to organizations and their facility executives. Competition for talent drives businesses and institutions to improve facilities, amenities and services to attract and retain employees.
- Helps manufacturers and service providers find new customers and exploit business opportunities that positively impact their sales and market position, ensuring a high return on their media investment.
- In addition to advertising and content dissemination, our team can help with advertorials, market research, white paper and research paper creation, sponsored events and more. We also have experts who can train your sales team to speak the language of facilities managers and help close the sale.

THE McMORROW REPORTS

COMMERCIAL NEWSLETTER

- The commercial facilities sector embraces multiple building types, operating under a principle of public access—open to employees and often the general public. The Commercial segment addresses information needs in the office (corporate / developer /management), retail, hospitality, entertainment, and aviation sectors.
- The commercial facilities sector is a key component of the critical infrastructure. The Commercial Building Energy Consumption Survey estimates there were 5.9 million commercial buildings in the United States in 2018, or 96 billion square feet of floorspace⁽¹⁾.
- The Inflation Reduction Act (IRA) will have an impact on the built environment due to the billion dollars it provides to help jurisdictions adopt and implement its advanced building codes, including a net zero energy code. The IRA offers incentives for retrofitting existing commercial building and for ramping up the manufacturing of products used to enable buildings to perform better — products like heat pumps and advanced sensors and controls⁽²⁾.
- The development of smart buildings is accelerated by rising real estate investment. A network that connects lighting, sensors, windows, doors, HVAC systems, and CCTVs in smart buildings has become an essential preventative maintenance activity in support of the smart buildings⁽³⁾.

FreeAxez has worked with The McMorrow Reports for many years. We have advertised in their newsletters, and they have assisted us with both content creation and customer relationship development. We are very happy with the results and look forward to a continued partnership.

Earl Geertgens

THE McMORROW REPORTS

EDUCATION & GOVERNMENT NEWSLETTER

- Combining the education and government sectors into one newsletter, provides a critical mass of subscribers and a greater value for advertisers. Issues are relevant to both sectors, and the products and services sourced by the specifiers often need to meet the same functional criteria.
- The content addresses the information needs of college, university, and government including federal and state agencies, military, and related A&D specifiers and engineers.
- There are 3,982* colleges and universities in the U.S. In 2012, The Cato Institute estimated that the federal government owned 306,000 buildings and leased another 55,000 buildings for a total of 361,000 buildings.

The McMorrow Reports and Eileen McMorrow are well respected in this industry. We have worked with her for many years and advertise in the Education & Government newsletters to great effect.

THE McMORROW REPORTS

HEALTHCARE NEWSLETTER

- Healthcare facilities include centers for ambulatory, behavioral health, blood donation, dialysis, education, maternity, radiology, and urgent care, in addition to clinics, offices, hospice and nursing homes.
- 6,093 is the number of hospitals in the U.S., according to the American Hospitals Association 2022 Hospitals Survey. Each hospital operates additional facilities and buildings to deliver patient and administrative services.
- Healthcare infrastructure in the U.S. is well developed. Its upkeep represents a large component of the annual \$4 trillion spent on American healthcare. Institutions compete with quality facilities for patients, physicians and researchers in addition to clinical capability.

I have had the opportunity to work with Eileen closely as a juror at several interior design conferences and have been very impressed with her calm professional approach to this challenging task. I have also had the privilege of attending networking events she has organized which enable healthcare designers and manufacturers to discuss issues related to our industry. The McMorrow Reports newsletter is one that I look forward to receiving, and I am grateful she is able to provide such a valuable resource to the Healthcare Interior Design community.

Uptime Institute's 2022 Global Data Center Survey reveals gains in resilience and reliability, but challenges with sustainability and outages

Global digital infrastructure authority Uptime Institute has just announced the release of its 12th Annual Global Data Center Survey. The findings show an industry that is growing, dynamic and increasingly resilient, but still working to address increasing pressure for sustainability progress and reporting, continuing staffing shortages, supply chain delays, costly outages and other complex challenges.

"The global digital infrastructure sector continues to enjoy strong growth and expansion, despite the many obstacles operators are facing today," said Andy Lawrence, executive director of Research, Uptime Institute Intelligence. "We've seen the industry invest in increased resiliency and reliability, but there's still work to be done when it comes to improving efficiency, environmental sustainability, outage prevention, staffing pipelines and more."

Read more . . .

Renewables, cooling are biggest drivers for sustainability gains

In your opinion, which of the following will have the biggest impact on making the data center industry more environmentally sustainable in the next three to five years? Choose one. (n=627)

- Improved data center cooling
- More renewable energy purchasing options
- Increased IT utilization
- Stricter environmental regulatory requirements for data centers
- Fixed lease
- More efficient chip technology
- Virtual use of public cloud data centers
- A significant increase in energy prices
- Improved data center management software

NBI's game-changing model code will help cut emissions in existing buildings

New Buildings Institute (NBI) has released the *Existing Building Decarbonization Code*, a new way for jurisdictions to reduce carbon emissions and meet climate action plan goals and interconnected goals around public health and equity. The need to address existing building stock is immense, notes NBI, with 5.9 million existing commercial buildings in the U.S. comprising 97 billion square feet. New construction represents less than 2% of building activity in any given year, leaving a vast opportunity to update technologies in the current building stock. By requiring existing buildings to be more energy efficient, cities could cut about 30% of all urban emissions by 2050.

NBI's February 2020 release of the *Building Decarbonization Code* provided the first off-the-shelf solution for jurisdictions to transform energy codes into decarbonization codes for new buildings. Expanding where

that document left off, the new *Existing Building Decarbonization Code* adds provisions specifically for existing buildings. The new model language covers both residential and commercial buildings, including all-electric and mix-fuel energy use pathways.

10 tips to help prevent dust explosions, from Goodway Technologies

As part of June's National Safety Month, innovative maintenance solutions provider **Goodway Technologies** remind plant and facilities managers and engineers of the importance of understanding the risk of dust explosions and fires in the work environment. The combustible power of airborne particles, such as dust, is astounding and can be a threat to a number of different industries, says the company.

OSHA's Combustible Dust: An Explosion Hazard resource notes that "a wide variety of materials that can be explosible in dust form exist in many industries," including "food (e.g., candy, sugar, spice, starch, flour, feed), grain, tobacco, plastics, wood, paper, pulp, rubber, pesticides, pharmaceuticals, dyes, coal, metals (e.g., aluminum, chromium, iron, magnesium, and zinc). These materials are used in a wide range of industries and processes, such as agriculture, chemical manufacturing, pharmaceutical production, furniture, textiles, fossil fuel power generation, recycling operations, and metal working and processing which includes additive manufacturing and 3D printing."

ACG guideline tackles effective building systems commissioning

The Associated Air Balance Council (AABC) Commissioning Group (ACG) recently announced the release of the **ACG Building Systems Commissioning Guideline**. The new digital publication, organized by specific types of building systems, offers insight and strategies from experienced commissioning providers on a variety of topics, and is designed to help providers execute the **ASHRAE Standard 202** commissioning process effectively and efficiently — while overcoming common challenges encountered in both design and field settings.

Jim Magner, CxA, EMP, ACG Guideline Committee chair, pointed out, "The ACG Building Systems Commissioning Guideline is a major leap forward, not only in its depth and breadth of information, but also in offering providers actionable guidance on implementation. The new edition tackles the what, when, who, and, most importantly, the how."

The **ACG Commissioning Guideline** was first published by AABC in 2001 and then updated and republished three years later by the newly independent AABC Commissioning Group (ACG).

International Energy Agency study: Renewable power is set to reach record levels worldwide in 2022 despite higher costs and supply chain delays

New capacity for generating electricity from solar, wind and other renewables increased to a record level worldwide in 2021 and will grow further this year as governments increasingly seek to take advantage of renewable power's energy security and climate benefits, according to the **International Energy Agency's (IEA)** latest report.

The world added a record 295 gigawatts of new renewable power capacity in 2021, overcoming supply chain challenges, construction delays and high raw material prices, according to the **Renewable Energy Market Update**. Global capacity additions are expected to rise this year to 320 gigawatts — equivalent to an amount that would

PRODUCTION REQUIREMENTS FOR DIGITAL ADS

Advertising creative/graphics must be supplied:

- two weeks before publication
- in digital format to exact sizes as specified above
- as png or jpg files below 4 MB. Please be advised, flash/swf or gif files are acceptable only for website ads (Max. 3 loops allowed in an animated gif). But click-through data cannot be provided in this format. Also ensure that the swf file has a functional link to your landing page.

PRODUCT OR CASE STUDY FEATURE

- +/- 125 words of copy (product feature)
- +/- 200 words of copy (case study)
- Low-resolution static visual, .png or .jpg and not more than 100 KB, typically around 300 x 250 pixels.
- A URL to where the client wants to direct the viewer. Advertiser also can anchor the URL to content on our website.

BONUSES

- All newsletter and website advertisers receive a one-year Gold Listing in the Fmlink FM Directory
- White Paper / Case Study website advertisers can supply multiple links to landing pages or websites.
- Micro-sites, White Papers and Case Studies receive periodic promotions in the Fmlink and McMorrow Reports newsletters.

DIRECT EMAIL PROMOTIONS

Client supplies content formatted for HTML delivery to selected segments of our database to reach from 1,000 to 48,000 subscribers. HTML design should be no wider than 600 pixels, with all external links fully functional. All images must reside on a publicly accessible web server.

WHITE PAPER

Objective, researched white paper that responds to a specific issue, with a research bibliography, website links, and sponsor identity information.

CUSTOM NEWSLETTER

Our team can help yours create a custom targeted e-newsletter to reach your clients and/or segments of our subscriber database.

OTHER OPTIONS

- Direct email campaigns to promote products and services.
- Conference and trade show marketing:
 - Conference and trade show promotion
 - Conference partner media
 - Conference match-ups
- Industry Insights Training: Help your sales team understand and reach our audience.
- Social Media: Support for client information dissemination (Twitter, Facebook and LinkedIn)
- Direct Print Mail: Creative production, printing and mailing available.

ADVERTISING PARTNERS

Our facilities management technology sector client was a start-up eager to raise awareness of its dynamic Spatial Intelligence Platform as employees returned to the office.

They wanted to connect with real estate and facilities decision-makers seeking a robust and reliable solution for occupancy and usage data. The McMorro Reports and FMLink covered all issues related to work from home, return to office, and workplace solutions that FM departments need. Across the range of segments they address, we knew their digital publications and websites could grow brand awareness and business for our client's technology.
